

Full-Cycle Project Support

When you partner with us, you can expect:

Consultative Guidance

We are your trusted advisors. Our knowledgeable outside sales representatives provide consultative guidance and answer your questions to help you make informed decisions to meet your vision and goals.

Solution-Oriented Approach

Our team is focused on offering optimal solutions. We take the time to understand your objectives and challenges, so we can make informed recommendations and offer the right solutions to meet or exceed your expectations.

Contact Your Local Representative

We are dedicated to collaborating closely with you to deliver tailored solutions and unmatched support, ensuring the seamless execution of your project. We maintain a strong working relationship with distribution partners across North America, to improve product availability, shorten lead times and meet the needs of our valued clients.

Partner with us on your next building design and construction project and discover the benefits of our full comprehensive support from planning to installation.

Personalized Attention

We treat each partner uniquely, tailoring our approach to your specific requirements. Our customer call center handles your order with the utmost care to ensure that your material orders are complete and accurate. Your success is our priority, and we are dedicated to supporting you in any way we can.

Proactive Support

We are committed to delivering exceptional customer service. Our team of inside sales personnel work closely with our building partners, to answer questions, address concerns, solve challenges and ensure project planning is smooth and efficient.

Unmatched Consultative
Support from Planning & Design
through Construction

Smart Minds.
Smart Materials.

Estimation Services

No Charge. No Hassle. No Worries.

The cornerstone of a successful building project starts with accurate material and cost estimates. When you partner with Engage, you receive a NO-charge, hassle-free estimation service to help you plan and budget more effectively. With more than 50 estimators, our in-house team of experts is dedicated to providing you with precise and detailed takeoffs and cost estimates.

Takeoffs & Cost Estimates

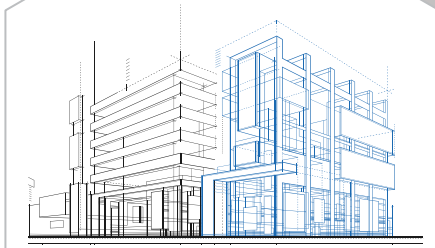

Our experienced team will carefully review your project requirements and specifications to provide you with a detailed estimate. We consider various factors such as materials, waste factors, and other relevant parameters to ensure accuracy.

Bill of Quantities (BOQ)

The Bill of Quantities is a comprehensive document that outlines the scope of work, quantities required, & waste factors for your project. It serves as a detailed breakdown of all the materials needed, helping you understand the project's requirements better.

Bill of Materials (BOM)

The Bill of Materials is a precise list of composite panels or planks, trims, and panel allocations specific to your project. This detailed inventory allows you to have a clear understanding of the materials needed for construction.

3D Rendering and Design

Visualize Your Project Before It Starts

As a new addition to our full suite of services and support, and our commitment to innovation, we now offer 3D renderings, for select projects. This service is prioritized for clients seeking full building envelope solutions and multi-product building applications.

Based on the unique nature of your project, we are pleased to introduce captivating 3D visualizations of your building design. Through our advanced estimation and planning solutions, we can now bring your project to life, prior to construction. Make your vision reality and witness your ideas take shape like never before with our 3D rendering service.

How to Request an Estimate

Contact Your Local Reps

(Option 1)

Reach out to your local Engage representative to discuss your project requirements and schedule an appointment. We will guide you through the estimation process and answer any questions you may have.

Submit Drawings Online

(Option 2)

Visit our website and submit your drawings online. Follow the instructions to upload your files securely. Our team will review the drawings and contact you to discuss the estimation process further.

Installation Support

Ready to Assist You Every Step of the Way

We are dedicated to delivering outstanding services and support to ensure the success of your project. Throughout North America, our installation professionals are always available, to answer questions, train and support installers, to achieve an exceptional final result. Our logistics team collaborates closely to ensure shipments arrive on-time, on-site for installation. We understand the importance of a smooth and efficient installation process, and our team is here to ensure that your project is completed to the highest standards.

On-Site Training

Our highly skilled & experienced building professionals provide thorough on-site training, ensuring your systems and solutions are installed accurately and efficiently, the first time.

Coverage

Our installation team is available across North America. No matter where your project is located, we can provide the assistance you need, ensuring consistency and quality throughout.

Ongoing Support

Once installation is complete, our team is available for ongoing support. If you have any questions, concerns, or need assistance, give us a call.
