THE NEXT GENERATION OF EASYTRIM HAS ARRIVED

EasyTrim Elegance builds on the trusted engineering principles of the original panel and lap systems and elevates them with precision detailing, refined profiles, and deeper architectural reveals, delivering smarter performance crafted for today's design standards.

◀ EasyTrim Reveals®

EasyTrim Elegance® ▶

WHAT'S NEW IN ELEGANCE

Featuring precision slimline profiles that sharpen transitions and create a more intentional visual frame, EasyTrim Elegance delivers deeper architectural reveals for bolder, more defined shadow lines. An integrated drainage channel is engineered directly into the backplate for cleaner, more reliable water management, while a refined minimalist aesthetic complements both modern and timeless cladding styles. The result is a system that enhances every elevation with clarity, discipline, and long-term durability, a trim package made to transcend trends rather than chase them.

Quiet design. Powerful performance.

A PAINT THAT WORKS AS HARD AS YOU DO

EasyTrim Elegance introduces a next-generation paint system engineered for real-world conditions. Through enhanced surface preparation and upgraded coating technology, the Elegance lineup now achieves ASTM D3359 5B adhesion, the highest rating possible for paint in its category. This means the coating bonds tighter to the aluminum, delivering a tougher, more resilient finish that stands up to transport, handling, and installation without compromise.

POWDER PERFECT™ SERIES

SEVEN NEW FINISHES. ONE FLAWLESS MATCH.

The EasyTrim Elegance Powder Perfect™ Series introduces seven new powder-coated finishes designed to match the most popular colors from the James Hardie® Statement Collection™.

Now Available in Arctic White, Cobble Stone, Monterey Taupe, Pearl Gray, Aged Pewter, Iron Gray, and Rich Espresso. Each finish is produced using an upgraded powder-coating process that delivers best-in-class durability, abrasion resistance, and long-term color stability, for a trim solution that aligns seamlessly with leading 5/16" fiber cement panels while providing a clean, cohesive exterior aesthetic.

THE TWO-PIECE ADVANTAGE

The EasyTrim Fit & Finish™ two-piece design gives installers greater control and delivers consistently precise results while reducing overall installation time. With the backplate installed first, panels can be cut to size and set cleanly in place without forcing, bending, or shimming them between two fixed trims. Once the panel is positioned, the top cap simply snaps on, creating a crisp, uniform reveal with far less effort.

EasyTrim Elegance makes installation faster, easier, and more cost-effective, while still preserving architectural intent, elevating façade quality, and strengthening the long-term performance of the building exterior.

MOISTURE MANAGEMENT

Moisture remains one of the leading causes of exterior cladding failures, and EasyTrim Elegance is engineered to address this challenge directly.

By incorporating drainage pathways directly into the trim profiles, the system moves water away from the building envelope rather than trapping it behind panel edges. This helps prevent swelling, rot, corrosion, and freeze-thaw deterioration over time.

Compared to traditional single-piece trims that rely heavily on caulking or incidental gaps for water movement, EasyTrim Elegance offers an intentional, engineering-based approach that enhances the long-term resilience of the entire façade.

SYSTEM BENEFITS

EasyTrim Elegance is designed with durability and low-maintenance performance in mind. The aluminum construction is inherently anti-corrosive and resistant to warping, peeling, splitting, or flaking, even under the harshest weather conditions.

UV-stable finishes maintain consistent color and appearance.

Full-edge protection shields panel edges from impact and environmental exposure.

APPLICATIONS & COMPATIBILITY

Engineered specifically for panel and lap siding assemblies, EasyTrim Elegance integrates seamlessly with fiber cement, lap, composite, aluminum, and engineered wood panels. The system supports a modern, refined aesthetic suitable for residential, multi-family, commercial, and mixed-use developments. EasyTrim Elegance delivers superior alignment, cleaner transitions, and a more cohesive architectural finish than multipurpose trim solutions.

WARRANTY INFORMATION

Every EasyTrim Elegance trim is backed by a 15-Year Limited Warranty for the original property owner. When installed correctly, the system is warranted to be free from defects in materials and manufacturing and will not split, crack, peel, blister, flake, rust, or experience abnormal weathering.

With proper substrate support, the profiles will not buckle or fail under normal conditions. If a warranted failure occurs, EasyTrim Elegance will provide replacement components at no cost to the original purchaser, excluding installation and labor.

Full warranty terms, claim procedures, and documentation are available at engagebp.com/easytrim.

PANEL TRIMS

5/16" PANEL TRIM SYSTEM OVERVIEW

The panel trim system is the foundation of EasyTrim. It's the original profile that set the standard for clean lines, lasting performance, and versatility. Building on years of proven performance, it has been refined to meet the demands of today's architecture while preserving the trusted ease of installation that made it a favorite.

Designed for broad compatibility with fiber cement and panel products, the panel trim system remains a true industry staple that continues to define the look of modern exteriors.

OUTSIDE CORNERS

OUTSIDE CORNERS

Length 10'

EasyTrim Elegance outside corners provide clean, consistent lines at exterior panel transitions, delivering a sharp architectural edge while protecting vulnerable panel ends. The two-piece design ensures precise alignment, improved durability, and a refined finish that enhances the overall look and performance of any 5/16" panel system.

LAP TRIMS

3/4" LAP TRIM SYSTEM OVERVIEW

The lap trim system is a purpose-engineered finishing solution designed specifically for lap siding applications. It establishes a defined edge detail that enhances shadow lines while protecting panel terminations and transitions. Built for durability and visual clarity, it delivers a consistent reveal that strengthens both performance and architectural intent.

Designed for compatibility with a wide range of lap siding materials, the 3/4" Lap Trim System provides a reliable, polished finish that elevates residential, multifamily, and light commercial exteriors with confidence and consistency.

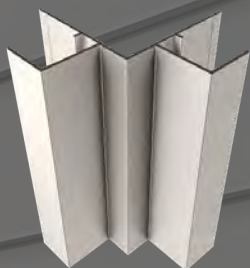

OUTSIDE CORNERS

OUTSIDE CORNERS

Length 10'

EasyTrim Elegance outside corners create crisp, uninterrupted lines at exterior lap transitions, defining each edge with precision while safeguarding exposed panel ends. The engineered two-piece design allows for accurate alignment, added strength, and a seamless finish, elevating both the visual impact and long-term performance of any 3/4" lap system.

PANEL TO LAP TRANSITION TRIMS

5/16" TO 3/4" PANEL TO LAP TRANSITION TRIMS OVERVIEW

The panel to lap transition trims are a purpose-engineered solution designed to create a clean, controlled shift between panel and lap cladding. They define a crisp, intentional edge detail while maintaining visual continuity across changing profiles.

Built for compatibility with a wide range of panel and lap materials, this transition system delivers a precise, polished finish that brings confidence, clarity, and architectural consistency to residential, multifamily, and commercial façades.

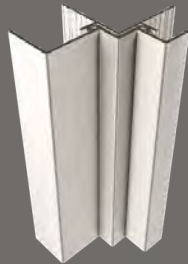

OUTSIDE CORNERS

OUTSIDE CORNERS

Length 10'

EasyTrim Elegance 5/16" to 3/4" transition outside corners create a sharp, controlled shift from panel cladding to lap siding at exterior edges. Designed to manage the depth change cleanly, they maintain crisp corner lines while protecting exposed terminations. The two-piece construction ensures precise alignment, added strength, and a seamless finish, supporting long-term performance with a refined architectural edge.

EasyTrim Elegance trims are backed by a 15-year Limited Warranty and are designed to meet the finish and installation requirements of major fiber-cement manufacturers' warranties.

BASIC INSTALLATION

Step 1:

Install vertical EasyTrim backplates.

Step 2:

Install horizontal EasyTrim backplates.

Step 3:

Install panel or lap siding.

Step 4:

Install EasyTrim topcaps; vertical first, then horizontal.

STYLES CHANGE.
YOUR TRIM SHOULDN'T HAVE TO.

For every build. For every era. This is **EasyTrim Elegance®**.
